

About Dynamic Shipping Services (DSS) Ltd.

‘We’ll Take It From Here’

Dynamic Shipping
Services (DSS) Ltd.

Dynamic Shipping was established in 1994 in the port city of Haifa, Israel. Since then, the company has grown into a highly reputable first-class shipping agency, with recognized expertise in project cargo, bulk carriers, containers, ro-ro vessels, and tankers of all types.

A highly qualified team of DSS personnel provides a full range of services for a varied client list, including government, military and private organizations. With this rich experience, DSS ensures each owner and charterer calling at any Israeli port receives personalized and efficient service.

From origin to destination, and every step along the way, DSS is your partner for comprehensive international cargo shipping services.

With worldwide service, including airfreight and inland destinations, no road is too long. And no cargo is too difficult. Our highly experienced teams specialize in handling project cargoes of all types (outsized – OOG – Out Of Gauge, IMO, military and hazardous), inbound and outbound.

Whether you need full door-to-door logistics, spot chartering, vessel management, or just streamlined interactions with the port authorities, we make it happen – quickly, efficiently and cost-effectively.

Chartering and Shipbroking

Whether you have cargo to ship or a ship ready for cargo, the chartering and shipbroking services of DSS are the premier professional solution.

DSS regularly charters multipurpose vessels, single deckers, bulk carriers and more, as well as handling airfreight chartering, for the transport of a wide array of freight. This has included all types of general and bulk cargo, as well as project cargo such as machinery and rolling stock.

Recognized as one of the most dynamic service providers of its kind in Israel, DSS has been selected by both government and private customers as their preferred chartering solution.

Port and Offshore Agency

As your agent in Israel, DSS ensures streamlined customs clearance and stevedoring, for fast and efficient vessel turnover at all local ports.

Our port and offshore agency services include:

- Coordinating vessel loading and discharging with the Israeli Port Authority.
- Becoming the key point of contact for local officials on behalf of the vessel or cargo owners.
- Customs clearance.
- Online progress reports.

DSS leverages its long-term relationships with the Port Authority and customs officials to protect your interests at every stage.

With this commitment, we have provided comprehensive high-quality agency services for hundreds of vessels, cargo owners, receivers, and shippers. We have done so at highly competitive rates.

Offshore Services

Within the Israeli Exclusive Economic Zone (EEZ), we are active in the offshore industry, providing crew, provisions, agency services, repairs and skilled workshops, or anything else you may need. DSS can create a tailored package of services that best meets your needs and budget.

In the liquefied natural gas (LNG) industry, DSS has the know-how to charter, coordinate contracts, provide project consultants, and render all required services. Our specific expertise includes LNG FSRU for floating receiving terminals or FLNG floating production, small-scale LNG feeders and bunkering [for any size from 0.5 MTPY].

DSS provides these extensive energy sector services to both government and corporate entities, all along the value chain. From exploration to production to delivery, we streamline operations.

Management and Husbandry

At times, for the most efficient shipping or offshore agency solutions, it makes sense to hand management of your vessel over to DSS.

We specialize in providing management services for vessels under time charter, stepping into the owners' shoes to take care of the crew and the vessel. Each management project includes a projected budget, giving top priority to maintaining the vessel's seaworthiness and condition.

Our comprehensive DSS management also includes:

- Obtaining ship supplies and spare parts, and making repairs, with the help of our local and international local suppliers.
- Filling in periodic surveys and arranging inspections, as required by law.
- Crewing the ship.
- Acting as the legal address of the vessel's owners.
- Obtaining insurance.

Door-to-Door Logistics

DSS will transport your cargo internationally, from the point of origin all the way to its ultimate destination, handling all the necessary logistics for the entire journey.

Whether by spot chartering, special voyage for full load vessel, liner or parcel, we handle all the operational logistics and documentation to make sure your cargo gets where it needs to be – by sea, air and land.

After DSS moves your freight to the seaport or airport, our teams make sure it is loaded for the next leg of the voyage. Whatever logistics are needed along the way – from airfreight clearance to cargo transit along the route – we make sure the voyage is cost-effective, secure and timely.

Upon arrival at the destination port, DSS teams leverage their long-term relationships with stevedoring companies and the Port Authorities to ensure your cargo is discharged and processed smoothly and quickly.

Finally, DSS handles the logistics of transportation from the port of entry to your receivers' doorstep, including, of course, inland destinations.

With DSS handling your logistics, no voyage is impossible.

Project and Heavy Lift Cargo

From international logistics to chartering to agency services, DSS specializes in handling heavy lift and project cargoes.

We bring experience, ingenuity and top-tier capabilities to both inbound and outbound project cargo transportation and processing, including:

- Oversized, OOG and heavy units
- Hazardous materials
- IMDG cargo classes
- Military vehicles and equipment
- Explosives
- Cargo requiring strict confidentiality

In order to meet all your project and heavy lift cargo needs, DSS is a proud member of two international organizations that bring together experts in the field:

[The Heavy Lift Group \(THLG\)](#)

The Heavy Lift Group is a collaborative effort of specialized heavy transport companies with global reach.

DSS and its THLG colleagues collaborate to provide pooled expertise, shared equipment, and the widest array of heavy lift services, such as: large-scale industrial project forwarding; crane operations; machinery installation and rigging; engineering; barge operations; and more. Together, THLG members support every size project, from a single domestic transport to the largest international multi-modal shipping venture.

[Global Project Logistics Network \(GPLN\)](#)

The Global Project Logistics Network is the premier non-exclusive professional network of independent companies specializing in international project cargo logistics. Members bring their expertise to bear for air, sea and land transport, as well as for specialized, oversized, out-of-gauge and heavy lift cargo.
